

# Manual Cleaning vs Automated Cleaning

Apollo equipment has been designed with operator safety and maximum cleaning efficiency in mind. All of our equipment is Australian Standards Compliant - AS4024 (Safety of Machinery), AS1554 (Structural Steel Welding) & AS3000 (wiring rules).

Gearbox driven turntable - 60% better cleaning efficiency than machines with turntables driven by water

Auto pump out of waste - allows the dirty solution to be pumped up to 50 metres to your disposal point

Programmable 7 day timer - allows for heating to be done outside of peak electricity hours and for the machine to be hot when your workshop starts, saving time and money

No filters to replace - cleaning of the centrifuge and pot strainer approximately 20 minutes per month

Auto water level top - no need to maintain the water level manually

All lids open past the centre of the turntable allowing for trouble free loading of parts with overhead crane on smaller models with a lid and overhead crane and forklift on larger models with door

Surface oil is removed using a disk type skimmer to ensure the parts are not covered in oil when they are removed

Heavy duty, Australian made centrifugal pump is located so that the pump seal can be serviced with removing the motor from the machine

Uses only hot water & detergent

# apollo Super Wash

Have you ever stopped to consider how much of your workshop staff's time is spent hand cleaning parts each day?

Assume your labour cost is \$50 per hour (incl. overheads)

Each week that's 5 hours at \$50 per hour - \$250 per week

Therefore over a month your cost is \$1,000

Over a year one man costs you \$12,000 to manually clean parts

## SW800

Basket Diameter	810mm
Job Weight (Maximum)	400kg
Job Height (Maximum)	470mm
Water Capacity	120 Litres
Pump	2.2Kw Westate
Power Outlet Required	20 AMP, 415V 3 Phase
Heaters	3 x 2.4K

## SW1409

Basket Diameter	1400mm
Job Weight (Maximum)	2000kg
Job Height (Maximum)	975mm
Water Capacity	360 Litres
Pump	5.5Kw
Power Outlet Required	32A 3 Phase
Heaters	3 x 3.6K

## SW1612

Basket Diameter	1600mm
Job Weight (Maximum)	2000kg
Job Height (Maximum)	1200mm
Water Capacity	450 Litres
Pump	5.5Kw
Power Outlet Required	32A 3 Phase
Heaters	3 x 4.8K

## SW1100

Basket Diameter	1100mm
Job Weight (Maximum)	750kg
Job Height (Maximum)	630mm
Water Capacity	250 Litres
Pump	4Kw
Power Outlet Required	20A 3 Phase
Heaters	3 x 2.4Kw

## SW2023

Basket Diameter	2000mm
Job Weight (Maximum)	4000kg
Job Height (Maximum)	1350mm or 2300mm
Water Capacity	800 Litres
Pump	2 x 5.5Kw
Power Outlet Required	62 amp
Heaters	2 x 14.4Kw

## SW1400

Basket Diameter	1400mm
Job Weight (Maximum)	1000kg
Job Height (Maximum)	660mm, optional 760mm
Water Capacity	330 Litres
Pump	5.5Kw
Power Outlet Required	32A 3 Phase
Heaters	3 x 3.6Kw

## SW3216

Basket Diameter	3200mm
Job Weight (Maximum)	4000kg
Job Height (Maximum)	1600mm
Water Capacity	1000 Litres
Pump	2 x 5.5Kw
Power Outlet Required	62 amp
Heaters	2 x 14.4Kw
